

Details of Instruments
For
Energy Audit Assignments

1. Tri-vector Power meter with 3 clamp-on type CTs for measurement of unbalanced and balance load.
2. Tri-vector Power meters with 1 clamp-on type CT for measurement of balance load.
3. Flue Gas analyzer.
4. Vane type Anemometer.
5. Hot wire type Anemometer.
6. Digital temperature indicator for liquids.
7. Digital temperature indicator for surface.
8. Infra red digital temperature indicator for surface.
9. Thermal Imager for thermography of electrical panels, HVAC & Chilled Water System
10. Digital Hygrometer for temperature and humidity measurement.
11. Transit time Ultrasonic non-contact flow meter for measurement of liquid flow rates.
12. Thermal Energy (BTU) meter with Ultrasonic flow meter & Temperature sensors
13. Lux Meter.
14. Doppler effect Ultrasonic Flow Meter for liquids
15. Harmonic Analyzer
16. Digital pressure gauges
17. Ultrasonic leak detector
18. Ultrasonic steam trap tester
19. Ultrasonic distance meter

Note: We have at least two sets of each instrument
